

Description of each element of the Poolbil outdoor billiard table:

Cues: Billiard cues for gameplay. You can use standard one-piece or two-piece cues.

Balls: Balls used in billiard games, standard size 57.2mm = 2.252 inches.

Drink holder: A holder for drinks, providing convenience during gameplay.

Legs: Sturdy, steel legs of the billiard table, powder-coated.

Poolbil logotype: Product logo.

Leveling feet: Height-adjustable feet, allowing for adaptation to uneven terrain.

Screw jack: Screw lift mechanism, used for table height adjustment.

Pocket: Receptacles where balls fall during gameplay, made of steel, hot-dip galvanized, and powder-coated.

Rails: Table edges integrated with rails made entirely of EPDM granules and bonded with polyurethane adhesives.

Cushions: Billiard bumpers integrated with the table rails, responsible for ball rebound, made of EPDM granules and bonded with polyurethane adhesives.

Bed with cloth: Table surface covered with billiard cloth. The tabletop surface is rubberized with a special structure designed to decelerate the movement of the balls.

Corner pocket: A pocket located in the corner of the table.

Slate: 30 mm thick table slate, providing a stable and flat playing surface.

Bubble level: Bubble level used for precise table leveling.

Frame / Frame apron: Steel frame of the table supporting the entire structure.

Frame corner: Corner of the table frame.

Cues holder and triangle hook: Holder for cues and hook for the triangle.
