## A unique entertainment that will pull kids away from their computers.

Modular rope parks are a unique product on the outdoor equipment market for children, youth, and adults. One place that can be enjoyed by people of almost any age. It's a combination of fun, sports, emotions, risk, and adrenaline. It's a place where you can break your own barriers and conquer new challenges.

Wherever our parks have appeared, they've been a huge hit, especially among age groups for whom a classic playground is no longer enough. Kids eagerly overcome obstacles, and their phones stay in their backpacks.

Freely modify the difficulty level to suit the widest possible range of participants.

The structure is based on hexagonal platforms that allow for expansion in six directions simultaneously on each pole. This allows you to create extensive structures adapted to the available space and expected traffic. The system consists of sets of ropes, various types of platforms, steps, tires, and bars. Looking for an original solution with extraordinary popularity potential?

Balance parks from Starmax are a product you should get to know better. We carry out terrain development projects, equipment installation, and safe surfacing in various technologies.

Safety certified according to PN-EN 15567-1+A1:2020-07
